

CEO Statement

Thank you for your interest in this ground-breaking initiative. Devolve Developer's belief in the imperative need for innovation in the archaic real estate industry led to the conception of our global solution to eradicate redundancies and inconsistencies. Our revolutionary blockchain based platform will unsettle the current real estate market by applying our innovative systems to deliver a comprehensive platform for all of your real estate needs. We aspire to create a more efficient ecosystem where transactions, services and investments are readily accessible, streamlined, and risk adjusted. We expect aggressive adoption in the real estate marketplace as we impudently work with government officials and urban planning departments, major industry players and experts to address the needs of the industry.

Our strategic model will initially capitalize on the unexploited international real estate development industry by creating an avenue for borderless participation in this high yielding investment environment. Further, we will expand into land registry, price trends and property valuation, to create a fully comprehensive commerce platform with relevant property listings, legal documentation preparation and accurate transfer of title. We've designed a solution to meet the needs of the real estate community.

Our global team of industry experts were studiously constructed to ensure the appropriate network is established to provide the advancements and value vital for the industry. Our board of advisors' extensive experience in real estate development and technology will ensure efficient and effective business and investment operations through our proprietary blockchain platform, concentrated on transaction management, investing, technology and data. To be aggressively adopted in the real estate market place we will promote our platform worldwide and establish strategic alliances with governments and local regulators, developers and real estate associated organizations which are essential to achieve a proficient and effectual market place.

We created the opportunity for individuals to participate in the global real estate market by accessing our reward-producing tokenized development projects through the use of our asset backed tokens, which are highly liquid and easily tradable. The blockchain and smart contract technology will increase the utility of the token to include additional services and functionalities such as shopping among our merchant providers, property registration and valuation and real estate transaction management.

Our business model is scalable, sustainable, differentiated and profitable, and complements the advancements of blockchain technology that will persuade the real estate market to profoundly alter its structure and product offerings and provide enhanced value proposition by adapting to the changing needs of the market.

We are very enthusiastic to embark on this initiative, and I am positive that you will mutually correspond in our optimism of the new direction of real estate.

To Your Prosperity,

Keith Ly, B.A., M.A.

CEO, Devolve Developer Corp.
